What is claimed is:

| • | |
|---|--------------------------------------------------------------------------------------------|
| 1 | A digital camera having a printing function comprising: |
| 2 | a moving member for moving from an out-of-use position to an in-use |
| 3 | position to perform a shooting operation; |
| 4 | a selector for selecting a printing operation to be performed; and |
| 5 | a controller for bringing the moving member into the out-of-use position in |
| 6 | response to the selection of the printing operation by the selector. |
| 1 | 2. The digital camera of claim 1, wherein the moving member is a flash |
| 2 | protruded from a storage position in a camera main body during shooting and, in |
| 3 | response to the selection of the printing operation, the controller drives the flash to |
| 4 | the storage position in the camera main body. |
| 1 | 3. The digital camera of claim 1, wherein the moving member is a shooting |
| 2 | lens barrel protruding from a camera main body during shooting and, in response to |
| 3 | the selection of the printing operation, the controller drives the shooting lens barrel to |
| 4 | a collapsed position. |
| 1 | 4. A digital camera having a printing function comprising: |
| 2 | a lens cover for moving from an in-use position to an out-of-use position to |
| 3 | perform a shooting operation; |
| 4 | a selector for selecting a printing operation to be performed; and |
| 5 | a controller for driving the lens cover to the in-use position in which a |
| 6 | shooting lens is covered therewith in response to the selection of the printing |
| 7 | operation. |
| 1 | 5. A digital camera having a printing function comprising: |
| 2 | a moving member for moving from a storage position to a protruded |
| 3 | position; |
| 4 | a selector for selecting a printing operation to be performed; and |

response to the selection of the printing operation by the selector.

a controller for bringing the moving member into the storage position in

| 1 | 6. The digital camera of claim 5, wherein the moving member is at least |
|--------------|-----------------------------------------------------------------------------|
| 2 . | one of a flash and a shooting lens barrel. |
| | |
| 1 | 7. A method of controlling a digital camera having a printing function, the |
| 2 | method comprising steps of: |
| 3 | moving a moving member from an out-of-use position to an in-use position |
| 4 | to perform a shooting operation; |
| 5 | selecting a printing operation to be performed; and |
| 6 | bringing the moving member into the out-of-use position in response to the |
| 7 | selection of the printing operation. |
| | |
| 1 | 8. A method of controlling a digital camera having a printing function, the |
| ₫2 | method comprising steps of: |
| <u>I</u> 3 | moving a lens cover from an in-use position to an out-of-use position to |
| 1D 4 | perform a shooting operation; |
| . 5 | selecting a printing operation to be performed; and |
| 4 | driving the lens cover to the in-use position in which a shooting lens is |
| 7 | covered therewith in response to the selection of the printing operation. |
| 171 | |
| 1111 | 9. A method of controlling a digital camera having a printing function, the |
| <pre>2</pre> | method comprising steps of: |
| 3 | moving a moving member from a storage position to a protruded position to |
| 4 | perform a shooting operation; |
| 5 | selecting a printing operation to be performed; and |
| 6 | bringing the moving member into the storage position in response to the |
| 7 | selection of the printing operation. |
